

# Patient Centric, Science Driven

PureInsight<sup>TM</sup>, our new, complimentary platform, delivers simple, personalized health reports for your patients that easily incorporate into your existing clinical environment. This platform simplifies the data collection process, prioritizes patient needs and assists in developing a holistic, scientifically supported plan of care that focuses on diet, exercise, lifestyle and supplement recommendations.

## FEATURES AND BENEFITS

Our new Multi-Symptom Questionnaire (MSQ) simplifies and streamlines patient data collection

Optional genetic testing, polygenic scoring and clinically validated questionnaires (GAD-7, PHQ-9, PSS-4) can offer supplementary insights to support your plan of care

Customizable displays provide actionable, evidence-based recommendations that prioritize a patient's most important health needs

Easily give your patients direct access to supplement recommendations available from Pure Encapsulations via our virtual dispensary
