

How can I be assured that your products meet label claims?

Pure Encapsulations labels list all ingredients, including the composition of the raw materials. Certified independent labs test raw materials and finished, encapsulated products. Using the most advanced equipment and test methods, these labs verify the potency and purity of ingredients. Independent heavy metal, pesticide and microbiological testing is also performed to ensure supplement purity and safety.

How soon can I get my supplements?

Products are available immediately at your doctor's office or dispensary. If your doctor does not have what you need in stock, we can ship it in 2 business days. Or, if they prefer, we can have the order shipped directly to you in the same amount of time. Products shipped by Pure Encapsulations are carefully handled. For instance, products requiring refrigeration are shipped in foam-insulated boxes with cold packs. Glass bottles are shipped with added padding to limit any chance of damage.

What educational resources do you have available?

Visit www.PureEncapsulations.com. Located on the homepage you will find an extensive Health Library, including a clinical database with information on hundreds of herbs and nutrients, health concerns, and potential drug interactions. Detailed Product Information sheets and downloadable brochures are also available and at no cost. A selection of printed scientific articles is also available upon request. All information is accessible to both health professionals and patients.

Pure Encapsulations supplements are available exclusively through healthcare professionals.

FREQUENTLY ASKED QUESTIONS

Find out why Pure Encapsulations' products exceed consumer brand quality and set the standards for other professional brands

Who is Pure Encapsulations?

Pure Encapsulations is committed to producing the most complete line of science-based nutritional supplements. Available exclusively through qualified health professionals, every finished product is pure and hypo-allergenic to best optimize the long-term health of the most sensitive patients.

Why should I choose Pure Encapsulations?

Pure Encapsulations is trusted by qualified health professionals world-wide. When you purchase Pure Encapsulations supplements, you can be assured that:

- Ingredients are of the highest grade and in the most bioavailable forms
- Formulations are clinical strength and developed in partnership with medical consultants
- Products do not contain hidden fillers, coatings, artificial colors or other excipients
- Supplement labels provide full disclosure of ingredients
- Products are manufactured in-house for superior quality control
- Label claims and potency have been verified by 3rd party labs
- Orders are expedited and shipped to specification
- Educational information is readily accessible by request or via website

Why should I get my supplements through a qualified health professional?

The strongest link between Pure Encapsulations' clinical-strength supplements and consumers is the presence and guidance of a qualified health professional. Factors including medical history, prescription medication, laboratory tests, and overall physical and/or emotional assessment play a critical role in determining which supplements are best and safest for you.

Are you a GMP registered facility?

Pure Encapsulations is NSF-GMP registered in the U.S., GMP certified in Canada and exceeds the standards of the United States Pharmacopeia (USP).

GMP Registered

What makes your products physician-strength?

Pure Encapsulations products are formulated to include the most bioavailable ingredients and provide strengths and dosing consistent with clinical studies and clinical experience. Ingredient levels reflect the most effective range and have been thoroughly evaluated for safety.

Is there really a difference in the raw materials used by one company vs. another?

Absolutely. Only raw materials from trusted industry leaders, including the finest suppliers from the U.S., France, Japan, Switzerland, Germany and Italy are used in Pure Encapsulations products. Suppliers must meet rigorous testing and quality criteria to qualify as a Pure Encapsulations supplier. Ingredient selection is based solely on quality not on cost. Products include chelated minerals, activated vitamins, free-form amino acids and standardized herbal extracts for enhanced effectiveness. And only premium grade, natural, fermented Japanese CoQ₁₀ and the most rigorously purified and assayed fish oils are used, as further examples.

Do you manufacture your own products?

Yes, Pure Encapsulations products are manufactured in-house in a state-of-the-art plant located in Sudbury, Massachusetts—providing full quality control from start to finish. Every step of the process is tightly regulated, including raw material selection, machinery operation, sterilization and critical quality checks. All manufacturing takes place in temperature, humidity and dust controlled rooms. The warehouse is climate controlled in order to maximize the stability of raw materials and finished products.
