

UNDA NUMBERED COMPOUNDS:

Patient Assessment, Evaluation and Practical Application

7-Session Webinar Series

Presented by Dr. Dickson Thom, ND, DDS

Session 2: February 19, 2020

The audio portion of this webinar is available via VOIP or teleconference. If you would like to access audio via teleconference, please dial:

- 1 (800) 806-5484 (toll free Canada/USA) or (416) 340-2217 (Toronto local number)
- Enter the Participant pass code 2540993#

Achieve Sustained Treatment Outcomes

Thank you for attending this educational program. We are pleased to offer you the following promotion.

15% off all UNDA Numbered Compounds

Use promotional code:

UNDA20

*Valid until June 8, 2020

To place an order, register for an education event or any additional questions, please call your Atrium Innovations representative at 1 (800) 263-5861 Canada or 1 (888) 737-6925 USA. You can also visit www.Seroyal.com or www.Seroyal.com

Speaker Disclosure Dr. Dickson Thom, ND, DDS

I am a paid advisor to Seroyal. I have no other conflicts of interest to disclose.

The Company assumes no liability for presenter's information, whether conveyed verbally or in these materials. All presentations represent the opinions of the presenter and do not represent the position or the opinion of the Company. Reference by the presenter to any specific product, process or service by trade name, trademark, or manufacturer does not constitute or imply endorsement or recommendation by the Company.

Seminars, teleconferences and webinars such as this are for educational purposes only and are intended for licensed health care practitioners.

Practitioners are solely responsible for the care and treatment provided to their own patients. These therapies are not substitutions for standard medical care. This presentation is intended for North American healthcare practitioners. U.S. healthcare practitioners, please note, product claims and dosing are in accordance with Health Canada regulations and have not been evaluated by the Food and Drug Administration (FDA). The information provided by speakers in this educational program, together with any written material, do not necessarily represent the view of Seroyal and are not intended as medical advice.

Homeopathy, Phytotherapy, Gemmotherapy, Oligo-elements and Schüessler Tissue Salts are modalities used in traditional medicine. Homeopathic uses are based on the Materia Medica and are not supported by clinical trials. These therapies are not substitutions for standard medical care.

Drainage covers the sum total of therapeutic means available to ensure elimination, through natural channels, of toxins vitiating the organism of a patient requiring treatment

Drainage in homeopathy (Detoxification); Dr. E.A. Maury, translated from French by Mark Clement; CW Daniel Company Ltd, England, 1965

Drainage therapies evolved from the work of Leon Vannier (1880-1963) and Antoine Nebel (1870-1954), French homeopaths in the early 1900's

They utilized organotherapies as a development from isotherapy that was introduced by the German veterinarian Johan Joseph Wilhelm Lux (1776-1849)

Antoine NEBEI

The Physician and Surgeon, A Professional Medical Journal, volume XXXII, 1910; page 50

Drainage therapies follow the law of similitude and the action of the infinitesimal dose.

The North American Journal of Homeopathy, published by The Journal Publishing Club (ltd) No 1748 Broadway, New York, Jan 1912, Third Series, Vol XXVII, page 187

From those beginnings has come the utilization of oligotherapy, lithotherapy, gemmotherapy, and combination remedies in concert with the well-established detoxification therapies. The addition of drainage remedies has proven clinically to enhance the effectiveness of other therapies and can be easily added the present practice of any physician. Many classical homeopaths claim that the simillimum is its own draining remedy. There is no contradiction between drainage and Hahnemanian homeopathy. One prepares the way for the other.

Organotherapy, Drainage and Detoxification; Dr. Joe Rozencwajg, MD, PhD; Natura Medica Ltd, 2008

Biotherapeutics

- Elementary remedies: air, water, light, electricity, magnetism, etc.
- Biochemical remedies: food, botanicals, enzymes, vitamins, minerals, chelation, etc.
- Mechanical remedies: exercise, structural integration, body work, massage, colonics, hydrotherapy, etc.
- Energetic: homeopathy, acupuncture, flower remedies, therapeutic touch, gemmotherapy, tissue salts, oligotherapy, etc.
- Mental and spiritual: positive thinking, prayer, meditation, etc.

WHERE DO THEY ACT?

Energetic

Functional

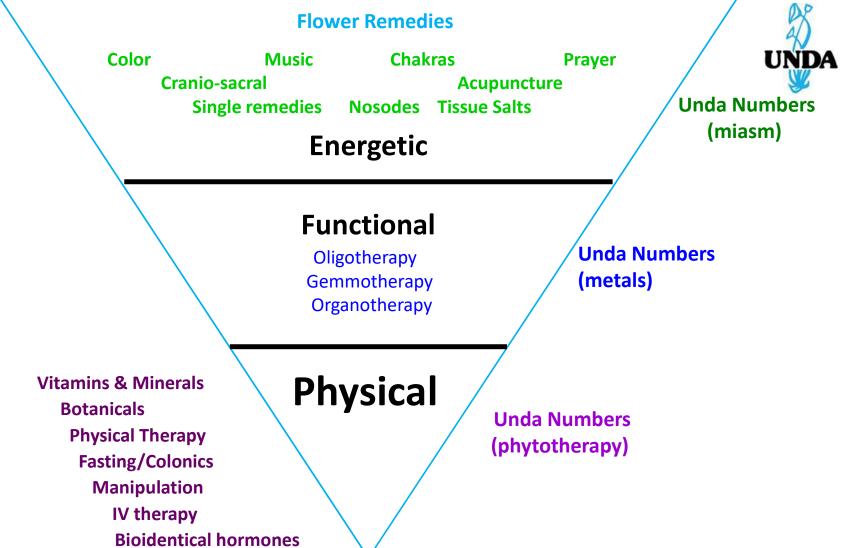

At which level do specific modalities have the greatest efficiency?

Physical

Why UNDA?

Located in Brussels and Harze, Belgium, UNDA is the largest homeopathic brand in Belgium.

UNDA is world renown for the quality and effectiveness of their products.

The word UNDA means undulating water.

UNDA products are formulated using a combination of GMO-free plant, mineral, and organic raw materials obtained primarily from local sources.

Products are thoroughly tested to verify that they are free of microbes, mycotoxins, pesticides, heavy metals and other contaminants.

UNDA incorporates meticulous laboratory analysis and rigorous quality testing to confirm that the appropriate concentrations of ingredients are present in its products.

Why UNDA? (continued)

Unda utilizes meticulous and distinctive Laboratory Analysis of remedies:

Column Chromatography - Plants are identified by botanists, and specific related details are logged and retained on computer for future reference

 Chromatography uses 4 curves of light (yellow, blue, red, black). Each product absorbs light differently so it can be uniquely identified. Each has its own fingerprint. Every year mother tinctures are analyzed to ensure that they are stable

Infrared Spectometry - Analyzes inorganic and organic chemicals

 Organic compounds are ground up and put in a gel. The analysis involves the compound migrating up the plate under a field of electricity

Fluorometry – Determines final products in solution

- The substance is placed in a device that produces two curves an excitation curve and an emitting curve
- This device provides a computer graph of the energy of the product. This graph is used to determine if the remedies are consistent from batch to batch

UNDA NUMBERED COMPOUNDS

UNDA Numbered Compounds

Unique remedies synergistically formulated with plant constituents that target and carry potentized metals to specific organs where enzymatic and metabolic functions are carried out on a cellular level, helping to facilitate the drainage of toxins

Facilitate the drainage of toxins on extra-cellular and intra-cellular levels, supporting individual organ systems

The only complex remedies of their type, formulated with both plants and metals, acting on organotropic and energetic sensitivity levels, respectively

Each Unda Numbered Compound has its own fingerprint and is combined synergistically based on the integrated principles and theories of oligotherapy, anthroposophy, botany, Traditional Chinese Medicine and homeopathy

UNDA Numbered Compounds are fundamental in Biotherapeutic Drainage®, as they work on a physiological and "terrain" level.

Each remedy is an integration of vast knowledge from Anthroposophical Literature Miasmatic Theory Oligotherapy Chinese Medicine and Homeopathy

Integration of PLANTS (4x-6x), Pure METALS 12x and ALCOHOL

(as a way to circulate the chi and blood)

+

+

16

PLANTS are organotropic, carrying the pure METALS to the appropriate site

They form a unique energetic complex, different from any other single remedy

Metals in the UNDA Numbers

AURUM/ GOLD

- Has a role in all functions, organs, terrains
- Supports cells, cell nucleus
- Important in RNA/ DNA processes

CUPRUM/ COPPER

- Supports the hematopoietic system part of hemoglobin
- Helps regulate hepatic function
- Aids production of antibodies, and resistance to infection, some viruses

Metals in the UNDA Numbers

ARGENTUM/ SILVER:

Has anti-infectious properties

ALUMINUM:

- Supports the nervous system
- Helps in situations of sluggish intellectual processes and cerebral atony

Metals in the UNDA Numbers

PLUMBUM/ LEAD:

- Helps with supporting degenerative health
- Helps with profound cellular intoxication

STANNUM/ TIN/ PEWTER:

Supports respiratory health

ANTIMONIUM/ ANTIMONY:

Supports respiratory health and proper bronchial secretions

UNDA Numbers – Therapeutic Action

- 1. Optimize function of natural emunctories
- 2. Move free toxins towards the natural emunctories
- 3. Normalize function of the glandular systems
- 4. By repetition, detoxify organs and recharge the enzyme systems
- 5. Cause profound modification of the "terrain"

5 Stages of Drainage

Cellular Stage:

- Intracellular toxins must be removed from the cell and its immediate surroundings
- Considerations to facilitate this stage are UNDA 1 and UNDA 18 (#1 for a benign process - functional concern, and #18 when there is a more advanced state such as a degenerative process that arises during a lesional situation)

Hepatic Stage:

- The liver filters and metabolizes toxins eliminated by the cells and passed into the bloodstream
- A consideration to encourage this stage is UNDA 20

5 Stages of Drainage

Renal and Pulmonary Stage:

- The totally catabolized acidic toxins are eliminated by the kidney or lung
- Considerations to encourage this stage are UNDA 2 and UNDA 5

Secondary Catabolic Stage:

- In the presence of chemical or dietary toxins, the body may produce a toxic intermediate
 metabolite from catabolic degradation and require an additional degradation or secondary
 catabolism. In addition, many chemicals such as some prescription medications,
 pesticides, and heavy metals may be incompletely catabolized
- Toxins can only be eliminated by the emunctories after they have been completely catabolized. Hence, the consideration of UNDA 258 for joint-health related concerns, UNDA 48 for degenerative situations, or UNDA 15 for feverish conditions can encourage healthy catabolism and eventual excretion of the toxins

5 Stages of Drainage

Emunctory Stage:

- Once the toxins have been degraded enough to be eliminated, they are carried to primary emunctories or to mucous membranes that are capable of serving as secondary emunctories (urinary tract, intestinal, pulmonary, genital or cutaneous)
- Considerations in managing these functions are UNDA 7, 50, 27, 245, and 270

Dosing UNDA Numbers

UNDA Numbers are generally administered for sublingual absorption

Adults & Children 12 years and older:

General Dosing

10 to 30 drops – one to three times daily

Acute Dosing:

• Follow the general dosing drop amount and take every 15 to 60 minutes (up to 12 times per day), or until symptoms improve; then resume General Dosing

Dosing UNDA Numbers

Children – 6 to 11 years old:

General Dosing

5 to 15 drops one to three times daily

Acute Dosing:

• Follow the general dosing drop amount and take every 15 to 60 minutes (up to 12 times per day), or until symptoms improve; then resume General Dosing

Children – 1 to 5 years old:

General Dosing

5 to 10 drops (one to three times daily)

Acute Dosing:

• Follow the general dosing drop amount and take every 15 to 60 minutes (up to 12 times per day), or until symptoms improve; then resume General Dosing

Dosing UNDA Numbers

Infants – birth to 11 months old:

General Dosing

1 to 5 drops one to three times daily

Acute Dosing:

 Follow the general dosing drop amount and take every 15 to 60 minutes (up to 12 times per day), or until symptoms improve; then resume General Dosing

Individual Organ Systems

Biotherapeutic Drainage® using UNDA Numbered Compounds works on both extracellular and intracellular levels to remove blockages (toxin accumulations, mental or emotional blocks)

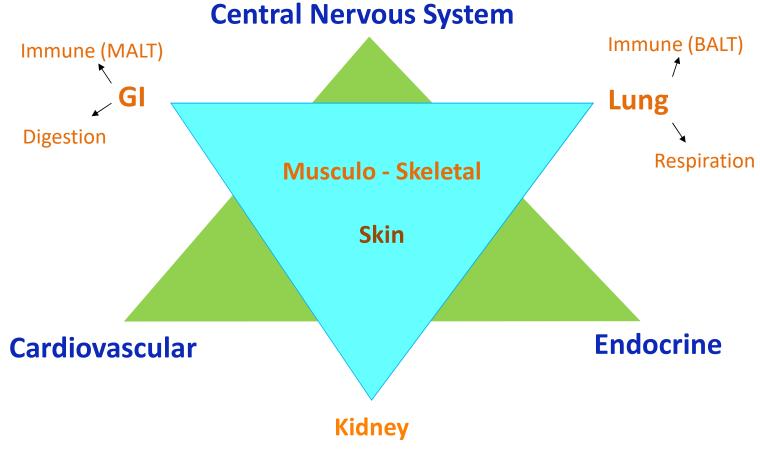

This helps to support physiological functions of the individual organ systems, encouraging the body towards a state of equilibrium and selfregulation

DRAINAGE: Key Remedies

* not 1st visit

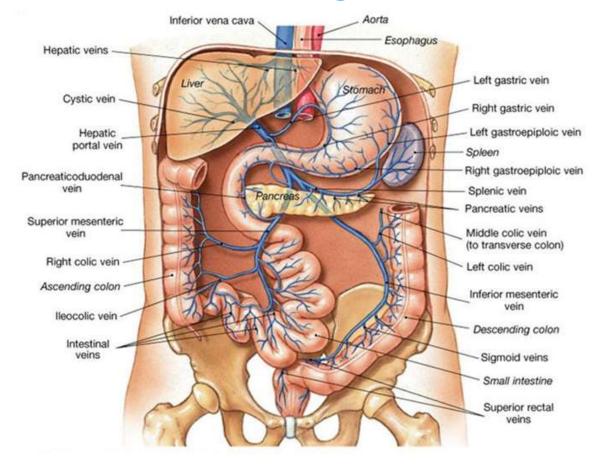

Digestive, Hepatic & Hepato-Digestive Systems

Hepatic System

Hepatic System Overview

- The primary responsibilities of the hepatic system include processing and storing nutrients in the body as well as cleansing and detoxifying the blood
- This complete system includes not only the liver and gallbladder, but is also associated with the hepatic portal system
- The hepatic portal system comprises of a series of veins that transport blood from the gastrointestinal tract (stomach, intestine, pancreas and spleen and gallbladder) to the liver. This activity supports the processing of nutrients and the detoxification of the blood before it re-enters the blood stream back to the heart

Digestive System Overview

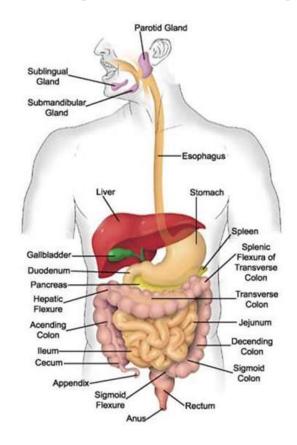

- The digestive system is a key segment of the gastro-intestinal tract, and is responsible for ingestion, secretion, mixing and propulsion, digestion, absorption and defecation
- Essentially, taking everything that we consume, processing it, absorbing nutrients, and finally expelling waste. This impacts our general health and wellbeing
- Our Enteric Nervous System (ENS) resides in the lining of our gastrointestinal tract and is referred to as our "second brain". Hence the health of our digestive system impacts our health on numerous levels

Hepato-Digestive System

This system incorporates liver and digestive function and health

Bryonia dioica	4x
Hydrastis canadensis	4x
Lycopodium clavatum	4x
Mercurialis annua	4x
Boldo	4x
Solidago virgaurea	4×

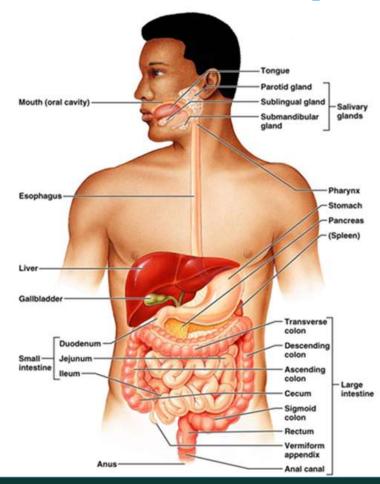

Digestive, Gastrointestinal & Entero-Hepatic Systems

Gastrointestinal System

Gastrointestinal System Overview

The Gastrointestinal System is responsible for:

- Ingestion
- Secretion
- Mixing and Propulsion
- Digestion
- Absorption
- Defecation

Optimal health relies heavily on a functional gastrointestinal system

Digestive System Overview

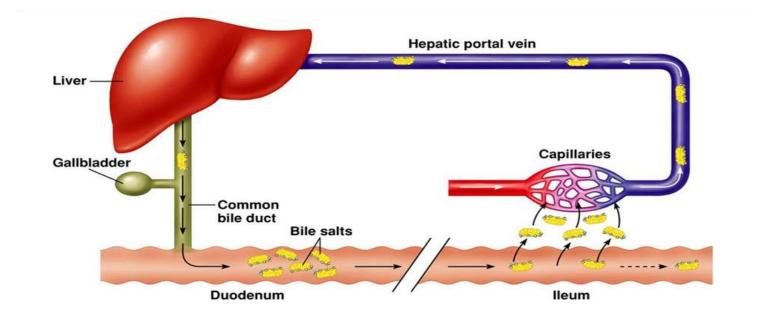

- The digestive system is a key segment of the gastro-intestinal tract, and is responsible for ingestion, secretion, mixing and propulsion, digestion, absorption and defecation
- Essentially, taking everything that we consume, processing it, absorbing nutrients, and finally expelling waste. This impacts our general health and wellbeing
- Our Enteric Nervous System (ENS) resides in the lining of our gastrointestinal tract and is referred to as our "second brain". Hence the health of our digestive system impacts our health on numerous levels

Entero-Hepatic System

This system facilitates Entero-Hepatic Circulation

Entero-Hepatic System Overview UNDA

- The Entero-Hepatic System facilitates the circulation of bile salts, bilirubin, and other secretions from the liver to the bile then to the intestine where they are reabsorbed into the blood and returned to the liver; where they are secreted into the bile and again enter the intestine. The remainder of the bile is excreted in feces
- This caters to the cycling of metabolites after excretion in the biliary system, and reabsorption in the intestine

Gastrointestinal & General Immune System Support UNDA

The Gastrointestinal & General Immune System Support protocol plan consists of formulas to support key emunctories related to digestive and gastrointestinal health, while respecting the body's natural physiology. This protocol plan facilitates the emunctories at an intracellular and extracellular level and also consists of a synergistic Genestra Brands™ immune system Phyto-gen remedy

The Gastrointestinal & General Immune System Support protocol plan consists of:

- UNDA Numbers 3, 20 & 50
 - · Imu-gen Phyto-gen

Clinical Case # 2

36 year Old Male presents with Impaired Gastroesophageal Health Function

- Complaints of hyper-acidity & indigestion
- Heartburn and a lot of heaviness and regurgitation the last 1 ½ years
- Symptoms are often every other day.
- < heavy meals, eating late, certain food items.
- Vegetarian, liked spicy and sweet food a lot, thirst was minimal
- Stool, perspiration, and sleep were ok.
- Physique was normal
- Mentally very anxious & sad, short-tempered.
- Very emotional, every small thing is upsetting.
- His mental status was predominantly related to the physical symptoms

Vitals 174 #, 123/78, 78, 97.8°F, 98% Abdomen – BS4Q, no tenderness

PROTOCOL PLAN

75

Basic Protocol Guidelines (BTG) - General

- Outside 30+ minutes a day (sunshine)
- Play, have fun daily
- Deep Breathing
- Water
- Movement (lymph)
- Hydrotherapy dry skin brushing, castor oil packs
- Sleep hygiene

- Apple cider vinegar
- Diet- AI, IR, GF, CF blood type, EAV, allergy free, etc.
- EFA's flax, chia, hemp, sunflower, sesame, pumpkin, fish oils, EPO
- Probiotics
- Minerals, vitamins

Basic Protocol Guidelines – 36 Year Old Male (Impaired Gastroesophageal Health Function)

- Outside 30+ minutes a day play, have fun daily
- Deep Breathing 100 a day
- 88 oz Water
- walk 150+ minutes/week
- dry skin brushing, castor oil packs evening
- Sleep hygiene in dark, 10:30PM, no Wi-Fi

- Apple cider vinegar
- Diet- Anti-inflammatory
- EFA's flax, chia,
- Fish oil
- HMF Intensive 50
- Trace mineral complex CWS

36 Year Old Male presents with Impaired Gastroesophageal Health Function

1. BTG (for all patients)

2. Amino-L glutamine powder -

1 scoop AM and PM

3. Unda 4, 24, 43 (226)

5 drops 3x a day

4. Calm-gen

10 drops 2x a day

Renal & Urinary Systems

Renal System

Renal System Overview

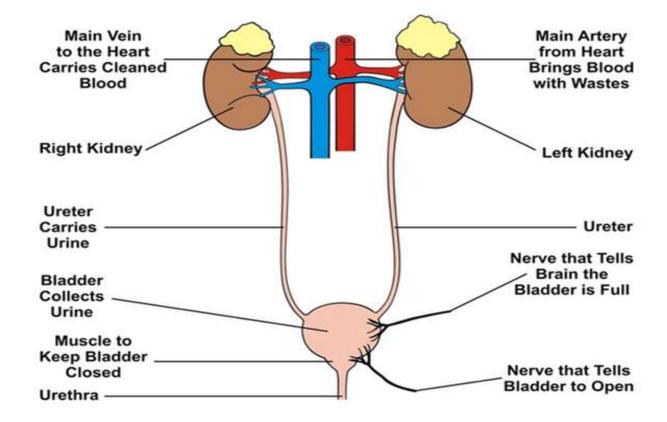

- Relating primarily to kidney function, the renal system is essential
- Kidneys are responsible for several key functions in the body including balancing body fluids, extracting waste by filtering blood to produce urine and releasing specific hormones to maintain optimal health
- On any given day our kidneys filter approximately 200 quarts of blood to process about 2 quarts of waste products and extra water from our system
- In balancing body fluids, the kidneys regulate minerals such as potassium, sodium and phosphorus – gauges them and determines the quantities that need to be released back into the blood for use and proper health maintenance
- The kidneys also release key hormones and substances

Urinary System

Urinary System Overview

- The urinary system comprises of the kidneys, bladder, ureters and the urethra. Among several functions, the urinary system is responsible for:
 - Regulation of blood ionic composition
 - Regulation of blood pressure
 - Production of hormones
 - Regulation of blood glucose
 - Excretion of wastes and foreign substance
- On any given day our kidneys filter approximately 200 quarts of blood to process about 2 quarts of waste products and extra water from our system

RENAL & URINARY SYSTEMS

Renal System Application

Organ System Applications:

Gastrointestinal, Hepatic, Renal

Applications:

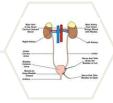

- Support for hepatic health and function
- Temporary relief of symptoms associated with indigestion, fatigue following meals and occasional headaches:
 - Indigestion
 - · Abdominal pain
 - Headache
 - Fatigue
 - Belching

Millefolium	4x
Angelica archangelica	4x
Uva-ursi	4x
Equisetum arvense	4x
Lycopodium clavatum	4x
Terebinthina laricina	5x
Valeriana officinalis	4x
Argentum metallicum	12x

Urinary System Application

Organ System Applications: Urinary

Applications:

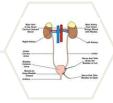

- · Support for urinary health and function
- Temporary relief of symptoms associated with minor fever:
 - Sweating
 - Sneezing
 - Fever
 - Headache
 - Nausea
 - Swollen tonsils

Asparagus officinalis	4x
Berberis vulgaris	4x
Genista tinctoria	4x
Juniperus communis	4x
Petroselinum sativum	4x
Rhamnus frangula	4x
Thlaspi bursa-pastoris	4x
Argentum metallicum	12x

Urinary System Application

Organ System Applications:

Urinary

Applications:

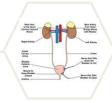

- · Support for urinary health and function
- Temporary relief of symptoms associated with difficult urination and occasional incontinence:
 - Frequent urination
 - Burning along the urinary tract
 - Incontinence
 - Difficult urination
 - Painful urination

Uva-ursi	4x
Equisetum arvense	4x
Cytisus scoparius	4x
Juniperus communis	4x
Hieracium pilosella	4x
Argentum metallicum	12x

Urinary System Application

Organ System Applications:

Respiratory, Urinary

Applications:

- Support for immune health function
- Temporary relief of mild fever:
 - Chills
 - · Head and body aches
 - Weakness
 - Headache
 - Fever

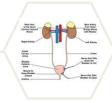

FORMULA

Allium cepa 4x
Eucalyptus globulus 4x
Trigonella foenum graecum 4x
Inula helenium 4x
Aurum metallicum 12x

Urinary System Application

Organ System Applications: Urinary

Applications:

- For the temporary relief of symptoms associated with occasional incontinence and minor urinary discomfort:
 - Involuntary urination
 - · Frequent, painful urination
 - Increased urine flow
 - Nightly urinary urges
 - Burning, soreness, sensitivity

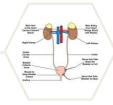

FORMULA

Equisetum arvense 5x
Hypericum perforatum 5x
Nux vomica 6x
Tormentilla 6x
Quercus rubra 6x

Note: This remedy does not have any metals

Urinary System Application

Organ System Applications: Urinary

Applications:

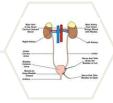

- For the relief of symptoms associated with minor difficulties in urination:
 - Frequent urination
 - Urge to urinate
 - Burning sensations
 - · Suppressed urination
 - · Straining during urination

Inula helenium	4x
Sarsaparilla	4x
Valeriana officinalis	4x
Stigmata maidis	4x
Aluminum metallicum	12x
Argentum metallicum	12x

Urinary System Application

Organ System Applications: Urinary

Applications:

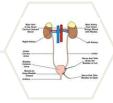

- For the temporary relief of symptoms associated with minor urinary discomfort:
 - Frequent urination
 - · Painful urination
 - · Painful retention of urine
 - Burning along urinary tract
 - Difficult urination
 - Urge to urinate
 - · Scanty urination

Uva-ursi	4x
Inula helenium	4x
Juniperus communis	4x
Dulcamara	4x
Stigmata maidis	4x
Cytisus scoparius	4x
Argentum metallicum	12x
Aurum metallicum	12x

Urinary System Application

Organ System Applications: Urinary

Applications:

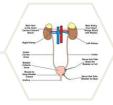

- For the temporary relief of symptoms associated with minor urinary discomfort:
 - · Frequent urination
 - · Difficult urination
 - · Painful urination
 - · Bladder weakness
 - · Frequent urge to urinate

Millefolium	5x
Uva-ursi	5x
Equisetum arvense	5x
Saxifraga granulata	5x
Dulcamara	5x
Stannum metallicum	12x
Argentum metallicum	12x

Urinary System Application

Organ System Applications:

Cardiovascular, Endocrine, Respiratory, Urinary

Applications:

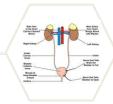

- For the temporary relief of minor symptoms associated with low energy and fatigue:
 - Drowsiness
 - Fatigue
 - Headache
 - · Restless sleep
 - Lethargy
 - Weakness
 - Sleeplessness

Calendula officinalis	4x
Condurango	4x
Sabina	4x
Lycopodium clavatum	4x
Thuja occidentalis	4x
Arsenicum album	12x
Aurum metallicum	12x
Plumbum metallicum	12x

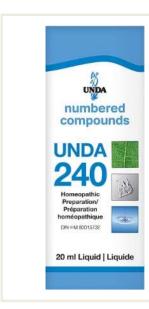

Urinary System Application

Organ System Applications:

Skeletal, Urinary

Applications:

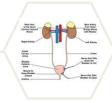

- For the temporary relief of symptoms associated with growing pains:
 - Headache, weakness
 - · Body aches
 - Limb heaviness

Equisetum arvense	6x
Gentiana lutea	6x
Salvia officinalis	6x
Saxifraga granulata	6x
Spiraea ulmaria	6x

Urinary System Application

Organ System Applications:

Digestive, Urinary

Applications:

- For the temporary relief of symptoms associated with poor digestion and minor urinary discomfort:
 - Stomach pain
 - Constipation
 - · Poor digestion
 - Flatulence
 - Frequent urination
 - Painful urination

Berberis vulgaris	4x
Bryonia dioica	4x
Hydrastis canadensis	4x
Lycopodium clavatum	4x
Mercurialis annua	4x
Boldo	4x
Solidago virgaurea	4x

Renal System Application

Organ System Applications:

Cutaneous, Renal

Applications:

- · Skin health and renal support
- For the temporary relief of symptoms associated with minor skin irritation and occasional headache:
 - Headache
 - · Skin eruptions
 - Skin blisters
 - · Red spots on skin
 - Dry skin

FORMULA

Calendula officinalis 4x
Equisetum arvense 4x
Hypericum perforatum 4x
Dulcamara 4x

Note: Also available as an ointment for topical use – will not cause suppression

Clinical Case # 3

- African-american female reports that for the last four weeks, frequent urging, strong odor and burning sensation whenever she eliminates
- She has switched methods of birth control so that she has been using a diaphragm for about five or six weeks. This occurred because she had begun having a sporadic sexual relationship with a man who refuses to use condoms
- She has tried drinking cranberry juice, but has only found that as time goes on, it seems to get worse
- She has only had a urinary tract infection once before, about four years ago, and it followed a bout with severe diarrhea; treated with a 10 day course of antibiotics

- Diagnosed with hypertension and high cholesterol at age 20, and has been taking medication ever since
- She experiences chronic knee and back pain, the result of an injury she sustained during a car accident five years ago
- Has been smoking since the age of 15, and reports that she has a chronic cough takes over-the-counter cough medicine
- She has always had difficulty sleeping; as a child, she frequently stayed up almost all
 night because of her inability to sleep. For many years, a physician has been prescribing
 medication for her to take at bedtime, which has helped her sleep approximately six or
 seven hours per night

- Several oral medications all at bedtime: Avapro 300mg; Zocor 10mg Diazepam 2mg;
 Klonopin, 1 mg,
- Allegra 60 mg, 1-2x/day during allergy season; sometimes uses Benadryl, relieve her allergy symptoms and also helps her to sleep.
- Vitamin D 1000 iu, Vitamin C 500 mg, Omega-3 Fish Oil 1000 mg, Glucosamine Chondroitin 1200 mg BID, and Vitamin E 400 IU per day.

O: 124#, 130/90, 88, 98.2°F, 17, 97%

pelvic exam sensitivity when touched as well as a strong, abnormal odor respiration was within normal limits although when asked to take a deep breath, the patient coughed several times

Dip – nitrate+, leukocyte esterase +, blood +

PROTOCOL PLAN

Unda 2, 7, 44
 5 drops 6x/day

Zea Mays
 75 drops 3x/day

Heather Young Shoot 10 drops 3x/day

Nat mur 6x
 2 tabs 3x/day

HMF Cystgen ½ sachet 2x/day

Continue until 2 days after total resolution of all symptoms

Urinary & Renal Health Support

The Urinary & Renal Health Support protocol plan consists of synergistic formulas to support the key emunctory relating to urinary tract health (the kidney), while respecting the body's natural physiology. This protocol plan facilitates the emunctories at an intracellular and extracellular level and also consists of a synergistic Genestra Brands™ renal system Phyto-gen remedy

The Urinary & Renal Health Support protocol plan consists of:

- UNDA Numbers 2, 7 & 44
- · Heather Young Shoot Phyto-gen

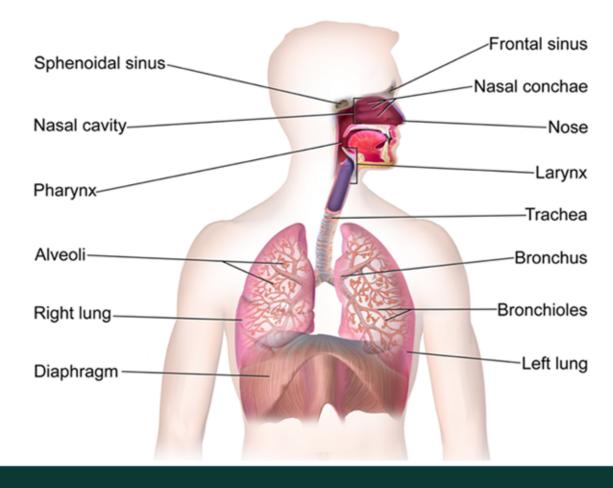

Respiratory System

Respiratory System

Respiratory System Overview

- The respiratory system consists of the nose, nasal cavity, trachea, sinuses, larynx, pharynx, bronchi, lungs, and diaphragm
- This system includes one of the key emunctories of the body. Primary functions of the respiratory system are, to facilitate:
 - O2 and CO2 gas exchange
 - Altering pH of blood
 - Angiotensin converting enzyme
 - Shock absorbency for the heart
