Poly-Prebiotic

PREBIOTIC BLEND TO SUPPORT THE MICROBIOME AND GI HEALTH

Prebiotics are nondigestible components of food that act to **modulate and support the gut microbiota**. Emerging evidence suggests that **prebiotics may play an even more significant role than probiotics**, serving metabolic, trophic and protective functions within the gut.^{1,3†}

Poly-Prebiotic is a **shelf-stable** prebiotic formula that includes 1.5 g of clinically researched PreticX[™] XOS (xylooligosaccharides) per serving and 225 mg of concentrated cranberry extract, standardized to contain 1% proanthocyanidins (PACs).

Supports colonocyte health and cytokine balance[‡]

Formulated for patients who are looking for additional prebiotic support.[‡]

RESEARCH STUDIES

- PreticX[™] XOS enhances the growth of Bifidobacteria, an important intestinal bacterial genus that maintains healthy gastrointestinal function.^{2-6‡}
- In a randomized, double-blind, placebo-controlled study, 32 healthy adult subjects were given 1.4 grams or 2.8 grams of PreticX™ XOS for 8 weeks. The Bifidobacterium count increased 21% from the baseline at 4 weeks and 17% from the baseline at 8 weeks in the highest dose group.⁴
- Cranberry was found to favorably modulate intestinal microbiota in preclinical models, supporting the abundance of beneficial taxa such as Bifidobacteria and Bacteroidaceae.^{7,10}
- In contrast to FOS and other common prebiotics, studies on XOS report very low incidence of gas and bloating.^{2,4,9}

Supplement Facts

3 capsules, 1-2 times daily, with or between meals

Three vegetarian capsules contain:

Total Carbohydrate	2 g
PreticX™ xylooligosaccharide	1.4 g
Cranberry (Vaccinium macrocarpon) extract (fruit)	225 mg
(standardized to contain 1% proanthocyanidins)	
Other ingredients: vegetarian capsule (cellulose, water)	

PreticX[™] is a trademark of AIDP, Inc. PreticX[™] is a patent protected xylooligosaccharide exclusively distributed by AIDP, Inc.

Poly-Prebiotic Quantity Order Code
