DGL Plus®

Introduced 1992

What Is It?

DGL Plus® is a combination of herbal extracts designed to support a healthy gastrointestinal tract.*

Uses For DGL Plus®

GI Health: This synergistic combination of deglycyrrhized licorice (DGL) and herbal extracts provides nutritional support to the gastrointestinal tract. DGL maintains intestinal comfort by enhancing the protective mucosal lining. Marshmallow root contains mucilage polysaccharides to soothe and protect mucous membranes, while slippery elm bark promotes mucous secretion in the GI tract. The combined actions of these extracts support the body's natural defense mechanisms by stimulating the mass, quality, and production of mucous, a major component of the stomach's protective lining.*

What Is The Source?

Deglycyrrhized licorice extract is derived from *Glycyrrhiza glabra* roots. Aloe vera extract (200:1) is derived from the inner fillet of *Aloe barbadensis*. Slippery elm is derived from *Ulmus fulva* bark. Marshmallow root extract (8:1) is derived from *Althaea officinalis*. Ascorbyl palmitate is derived from corn dextrose fermentation and palm oil.

Recommendations

Pure Encapsulations recommends 1 capsule daily, before a meal, or as directed by a health professional.

Are There Any Potential Side Effects Or Precautions?

Not to be taken by pregnant or lactating women. At this time, there are no known side effects or precautions. DGL licorice extracts do not contain glycyrrhizin and therefore are not associated with glycyrrhizin-containing licorice side effects. Consult your physician for more information.

Are There Any Potential Drug Interactions?

Marshmallow and slippery elm may impair the absorption of other oral medications. Consult your physician for more information.

DGL Plus®

each vegetarian capsule contains  v 00

deglycyrrhized licorice (<i>glycyrrhiza glabra</i>) extract (root).....	300 mg
aloe vera (<i>aloe barbadensis</i>) extract (inner fillet)	50 mg
(standardized to contain 10% polysaccharides)
