Berberine UltraSorb™

Enhanced absorption berberine

INDICATIONS

- Ages 18 and up
- Glucose metabolism support[‡]
- Metabolic function support[‡]

BENEFITS

- Promotes healthy glycemic control[‡]
- Helps maintain healthy blood glucose levels already within the normal range[‡]
- Promotes healthy insulin receptor function and signaling[‡]

FEATURES

- Provides 550 mg of clinically-studied, enhanced bioavailability berberine phytosome
- Four times more bioavailable than standard berberine
- Made with high-quality, vegan ingredients backed by verifiable science

VERIFIABLE SCIENCE

Berberine UltraSorb provides Berbervis®, a berberine phytosome with enhanced bioavailability. 1 Several randomized, placebo-controlled clinical studies indicate that berberine promotes healthy insulin receptor function and signaling, thereby supporting glucose metabolism.²⁻⁸ Berberine supports the activation of AMP kinase (AMPK), a central regulator of cellular energy homeostasis. This master metabolic switch is involved with maintaining healthy cardiovascular function, insulin signaling and glucose metabolism.² Berberine also helps to maintain cholesterol levels already within the normal range.³ Clinical studies show that daily doses of 1,000-1,500 mg of standard berberine supports cardiometabolic parameters, including lipid and triglyceride metabolism and healthy blood flow.³⁻⁸ In a clinical study, berberine supplementation of 500 mg twice daily for three months provided clinically and statistically significant support for healthy lipid profiles compared to baseline. ⁶ Berberine may also support endothelial function and colorectal health. 9,10‡ A pharmacokinetic study in healthy adults reported that supplementation with 550 mg of Berbervis® berberine phytosome was four times more bioavailable compared to standard berberine.1‡

SUGGESTED USE

As a dietary supplement, take 1 capsule, 1-2 times daily, with or between meals.

STORAGE

Store in a cool, dry place.

WARNING

Not to be taken by pregnant or lactating women. If you have any health condition or are taking any medication, consult your health professional before use.

SOURCE

- Berbevise is manufactured from Berberis aristata root extract
- Pea protein isolate is derived from Pisum sativum seed
- Lecithin is derived from sunflower
- Grape seed extract is derived from Vitis vinifera seed
- Hypo-allergenic plant fiber is derived from pine cellulose

NOTES

Capsule size 00

Bottle count 60

Bottle size 190cc

Order code BUS6

Berberine UltraSorb™

Enhanced absorption berberine

SUPPLEMENT FACTS

1 capsule, 1-2 times daily, with or between meals One (size 00) capsule contains:

Berbevis® berberine - Indena Phytosome™ complex (Berberine and sunflower phospholipid complex) (standardized to contain 28% berberine) 550 mg

Other ingredients: Berbevis® berberine - Indena Phytosome™ complex (Berberis aristata root extract, pea protein isolate, sunflower lecithin, grape seed extract, cellulose, silicon dioxide), vegetarian capsule (cellulose, water), hypoallergenic plant fiber (cellulose), ascorbyl palmitate

Berbevis® berberine - Indena Phytosome™ complex are trademarks of Indena S.p.A., Italy
