VERIFIABLE SCIENCE

Artemisia, which contains artemisinin, has been used traditionally for thousands of years to promote healthy microbial balance within the body.¹ Olive leaf extract contains the active constituent oleuropein, a phenolic glucoside that helps maintain healthy G.I. and respiratory tract microorganism balance and may help support immune function.² Oregano oil powder offers antioxidant and microbial balancing properties. In vitro and animal research suggests that oregano oil and clove can diffuse through microbial cell membranes, promoting membrane permeability.³ Clove has been used traditionally to promote healthy fungal and microbial levels.⁴ Berberine sulfate is a highly concentrated microbial balancing compound.^{5†}
