VERIFIABLE SCIENCE

Cranberries have been used for hundreds of years as nutritional support for the urinary tract. Cranberry concentrate provides support without the unwanted sugar found in cranberry juice. The role of cranberry concentrate includes enhancing the acidity of urine and maintaining a healthy urinary tract ecology.¹ Constituents of cranberry concentrate associated with its benefits include proanthocyanidins as well as d-mannose.^{2,3} Research has suggested the potential for cranberry juice to interact with lectin receptors and maintain a healthy bladder wall.⁴ At Brigham and Women's Hospital in Boston, a randomized double-blind, placebo-controlled trial involving over 150 female volunteers reported positive support for a healthy urinary tract after administration of a cranberry beverage.⁵ Our cranberry concentrate is made from 100% whole cranberry fruit solids through a proprietary process that concentrates the health-benefiting components of cranberries without the use of solvents or sugars.[†]
