## VERIFIABLE SCIENCE

Resveratrol is a compound often associated with the health benefits of red wine because of its antioxidant and cardioprotectant properties. Resveratrol promotes cardiometabolic, neuronal and cellular health through a variety of effects on cell signaling, mitochondrial function and endogenous antioxidant defenses.<sup>1-4</sup> It also promotes healthy platelet function and maintains healthy arachidonic acid metabolism.<sup>1,2</sup> Pure Encapsulations<sup>®</sup> Resveratrol is a clinically studied extract of *Polygonum cuspidatum*, an herb utilized for centuries. In a 6-week, randomized, placebo-controlled study of healthy subjects, one capsule of Pure Encapsulations<sup>®</sup> Resveratrol (40 mg/day) provided significant support for antioxidant markers and cytokine balance.<sup>3</sup> In a subsequent clinical study, 6 weeks of daily supplementation with this product (40 mg/day) improved cytokine balance in elite athletes subjected to rigorous training.<sup>4†</sup>
